Armstrong Adds 6" Wide Planks to MetalWorks™ Linear Ceilings Line

New plank width available for both interior and exterior applications

LANCASTER, PA – Armstrong® Ceiling Systems has expanded its portfolio of MetalWorks™ Linear products to include new 6" wide planks.

With the introduction of the new 6" width, the MetalWorks Linear line of standard ceiling products now includes four (4", 6", 8", and 12") plank widths for interior applications, including a nominal 1" reveal, and three (4", 6", and 8") plank widths for exterior applications, tested to meet wind uplift classes 30, 60, and 90.

All MetalWorks Linear planks are 96" long and 5/8" high. Custom sizes are also available. Acoustical options are offered in microperforated planks. When backed with an optional acoustical infill panel, microperforated planks can provide an NRC of up to 0.85, meaning they absorb 85 percent of the sound that strikes them.

MetalWorks Linear planks are available in six Effects™ Wood Looks finishes, including Maple, Cherry, Dark Cherry, Walnut, and new Walnut Espresso and Oak, and three colors, including White, Silver Grey, and Gun Metal Grey. Additional colors are also available as a premium or custom option.

The durable, metal planks are easily installed in the ceiling, on the wall, or as 90° angled or faceted ceiling-to-wall transitions. End caps are available for floating installations.

For more information about MetalWorks Linear, visit armstrong.com/metalworkslinear, chat live, or call a U.S.-based TechLineSM expert at 1-877-276-7876, press 1.

Armstrong World Industries is a global leader in the design and manufacture of ceilings and floors.
