## Armstrong® Introduces New Fully Integrated Axiom® Light Covers

*New light covers integrate with all Armstrong suspension systems and lighting fixtures from four lighting partners*

**LANCASTER, PA** — Armstrong® Ceiling & Wall Systems has introduced Axiom® Direct and Indirect Light Covers, a new line of light covers that integrate perfectly with all Armstrong acoustical and drywall suspension systems and lighting fixtures from four lighting partners.

Light covers are often challenging because the light and pocket are rarely designed to work together. As a result, light performance can be less than satisfactory. Poor paint quality or missing drywall can also affect the overall quality of the light cove.

The new Axiom pre-engineered solution features light covers and light fixtures designed to work together, making them easy to specify while providing predictable lighting performance, consistent fit and finish, and a seamless visual.

### Integrate with Light Fixtures

New Axiom Direct Light Covers install with integrated LENO light

fixtures from XAL Lighting. The light covers feature a low profile design for ultra-low plenum clearance along with plug-and-play lighting for easy installation. The XAL luminaire features high output, energy-efficient LED lighting.

New Axiom Indirect Light Covers install with integrated light fixtures from Axis Lighting, Litecontrol, and Vode Lighting, and offer a variety of options for both ceiling-to-wall and ceiling-to-ceiling light covers in a wide range of sizes. In addition, a new Axiom Knife Edge® profile brings acoustical panels out to the edge of the cove.

### **Fast and Easy to Install**

Manufactured from extruded aluminum, both Axiom Direct and Indirect Light Covers are fast and easy to install and integrate with any Armstrong acoustical or drywall suspension system. Because they require significantly less framing, the new light covers install in a fraction of the time of typical drywall light covers.

For more information on new Axiom Direct and Indirect Light Covers, go to [armstrong.com/axiomlightcovers](http://armstrong.com/axiomlightcovers).

Armstrong World Industries is a global leader in the design and manufacture of ceilings and floors. In 2014, Armstrong consolidated net sales from continuing operations totaled approximately \$2.5 billion. Based in Lancaster, PA, Armstrong operates 32 plants in nine countries and has approximately 7,500 employees worldwide.
