New WoodWorks® Torsion Spring Ceiling System from Armstrong Offers Monolithic Look Plus Plenum Access

Clean, concealed appearance with downward accessibility and easy installation

LANCASTER, PA — WoodWorks® Torsion Spring, a new addition to the Armstrong® family of Torsion Spring ceilings, offers a clean, monolithic visual in a concealed suspension system, downward accessibility to the plenum, and easy installation.

Available in both large format rectangular panels up to sixteen square feet in size and radial panels, the new Torsion Spring ceiling is offered in a choice of standard and custom WoodWorks veneer options.

A variety of perforation patterns are offered depending on aesthetic and acoustical needs.

Installs in Standard Suspension System

Seismic tested and approved, WoodWorks Torsion Spring ceiling panels install quickly and easily in a standard Armstrong Prelude® XL® suspension system. All ceiling system components are available through a single source.

Environmentally, WoodWorks Torsion Spring panels contain a recycled content of up to 86%, are USDA Certified Biobased products, and are both FSC® and Rainforest Alliance certified.

Torsion Spring systems are also available in Reflections™ Laminates with wood-look visuals on metal for interior and exterior installations, as well as Altitudes™ monolithic panels. Both provide acoustical options for noise reduction.

For additional information on WoodWorks or other Torsion Spring Ceilings, visit armstrong.com/woodworkstorsionspring, armstrong.com/metalworkstorsionspring, armstrong.com/altitudes, chat live, or call a U.S.-based TechLineSM expert at 1-877-276-7876, press 1.

Armstrong World Industries is a global leader in the design and manufacture of ceilings and floors. In 2014, Armstrong consolidated net sales from continuing operations totaled approximately \$2.5 billion. Based in Lancaster, PA, Armstrong operates 31 plants in eight countries and has approximately 7,400 employees worldwide.
