New Field-Cut End Cap from Armstrong Ceiling Solutions Ensures Clean, Professional Finishing Detail

***New Accessory for MetalWorks™ Blades – Classics™
Eliminates Need for Custom Panel Lengths***

LANCASTER, Pa. – With the introduction of the new Field-Cut End Cap for its line of MetalWorks™ Blades – Classics™ vertical panels, Armstrong Ceiling Solutions is ensuring a clean, professional finish for panel lengths that are modified in the field. Contractors and installers can now cut Blades – Classics panels to fit any project when using the End Cap.

By creating a clean, professional look, even on perforated panels, the Field-Cut End Cap gives architects and designers the flexibility to obtain the panel lengths they desire for their unique ceiling designs without the need for custom panel lengths and custom lead time.

With no limit on the panel lengths it can accommodate, the Field-Cut End Cap offers endless options for achieving an upscale linear look using only standard MetalWorks Blades – Classics panels.

Jobsite Flexibility

Easily installed with no need for glue or fasteners, the 1" x 4" Field-Cut End Cap gives installers the flexibility to modify the length of the blades panels on the jobsite to accommodate structural columns, ducts, and other obstructions while maintaining a professional finish and safe end detail.

The new Field-Cut End Cap is available in nine finishes to coordinate with MetalWorks Blades – Classics panels, including Whitelume, Silverlume, and Gun Metal, and six Effects™ Wood Looks finishes, including Maple, Cherry, Dark Cherry, Walnut, Walnut Espresso, and Oak. Custom colors are also available.

Panels are available in standard 23", 47", and 96" lengths in both acoustical and non-acoustical options. Made from durable aluminum, for lighter, easier handling, the vertical panels are easily installed on a standard 15/16" Armstrong® Prelude® suspension system, are seismic tested, and have a Class A fire rating.

MetalWorks Blades – Classics panels are part of the Sustain® portfolio which means they meet the most stringent sustainability compliance standards today.

For more information about MetalWorks Blades – Classics panels and the new Field-Cut End Cap, visit www.armstrongceilings.com/blades-classics, chat live, or call a U.S. based TechLine expert at 1-800-276-7876.
