## **Extend Wood Ceiling Designs Outdoors with New WoodWorks® Linear Exterior Solid Wood Panels from Armstrong Ceilings**

*Western Hemlock Panels Allow for Exterior Use*

LANCASTER, Pa. – The beauty and warmth of solid wood linear ceiling panels can now be extended from indoors to outdoors with the introduction of WoodWorks® Linear Exterior Solid Wood Panels from Armstrong Ceiling Solutions.

Made from Western Hemlock, the panels are specially manufactured to withstand outdoor conditions, making them suitable for use on the underside of soffits, overhangs, and other exterior surfaces that are not directly exposed to the elements.

### **Seamless Transition**

WoodWorks Linear Exterior Solid Wood Panels give designers the flexibility to achieve the same linear wood look for both interior and exterior applications, creating a seamless

transition for dramatic indoor-to-outdoor design.

The linear wood panels are 12" x 96" in size and are available with both three-inch and five-inch plank widths. The panels are easily installed by screw-fastening them to a 15/16" Prelude® XL Exterior suspension system. The use of black suspension system creates a dramatic visual as grid visually disappears.

### **New Clear Coat Finish**

Panels are offered in a choice of six standard finishes, including a new Clear Coat finish that accentuates the grain of the Western Hemlock panels. Other standard finishes include Maple, Light Cherry, Dark Cherry, Walnut, and White. Custom stains are also available.

For more information about WoodWorks Linear Exterior Solid Wood Panels, visit [armstrongceilings.com/woodworks](http://armstrongceilings.com/woodworks), chat live, or call a U.S. based TechLine expert at 1-800-276-7876.
