Armstrong Introduces Axiom® Indirect Field Light Coves for Use with Specialty Ceilings

New additions offer predictable lighting performance and perfect integration with variety of Armstrong MetalWorks™ and WoodWorks® ceilings

LANCASTER, Pa. — New Axiom® Indirect Field Light Coves from Armstrong Ceiling & Wall Solutions offer predictable lighting performance and perfect integration with select Armstrong MetalWorks™ and WoodWorks® ceilings and suspension systems.

Along with lighting partners, Axis and Vode, the [Armstrong pre-engineered light coves](#) provide control over finished aesthetics by offering a variety of options and sizes with both ceiling-to-wall and ceiling-to-ceiling coves.

MetalWorks ceilings compatible with the new covers include MetalWorks Torsion Spring, Linear Classics, Linear Synchro™, Linear Diverge™, Clip-On, Open Cell, Concealed, and 3D. Compatible WoodWorks ceilings include WoodWorks Grille, Grille Tegular, Concealed, Torsion Spring, Open Cell, and Linear.

Easy to Specify

The new covers feature pre-fabricated corners, Classic and Knife Edge® profiles, and the ability to modify the light cove if unexpected field conditions arise, including the ability to cut to the length desired in the field. An adjustable trim clip allows for a range of 0" to 3-3/4" to accommodate specialty panels.

Axiom Indirect Field Light Covers are part of the new [Armstrong® 24/7 Defend™](#) portfolio of ceiling and wall products that contribute to healthier, safer spaces and cleaner air. The new covers are also part of the Sustain® portfolio and meet the most stringent sustainability compliance standards today.
