## **MetalWorks™ Mesh Ceiling Panels from Armstrong Now Available in Larger Sizes**

*Larger lay-in panel sizes offer more options for bringing striking, industrial visuals to interior spaces*

LANCASTER, Pa. – With the addition of larger panel sizes to its family of MetalWorks™ Mesh ceiling panels, Armstrong Ceiling & Wall Solutions is offering more options for bringing striking, industrial visuals to interior spaces.

New, large format 24" x 48", 24" x 72", and 24" x 96" lay-in ceiling panels are now available as standard for select items in Expanded Metal, Woven Wire, and Welded Wire MetalWorks Mesh patterns in a variety of colors.

This expanded offering of [MetalWorks Mesh](#) items joins the existing line of 24" x 24" panels which includes 32 patterns and a variety of standard colors. Custom patterns and colors are also available. Select 24" x 24" panels are part of the [Armstrong® FAST134 Program](#), meaning the panels ship to the job site in four weeks or less. Acoustical infill panel options provide high sound absorption and help conceal elements in the plenum.

## Simple Installation

MetalWorks Mesh panels lay in a standard 15/16" suspension system with borders or finished edges, making installation simple. A factory-engineered border around panel edges allows safe, fast installation in the grid system.

MetalWorks Mesh panels are part of the [CleanAssure™ family of products](#), including disinfectable panels, suspension systems, and trim, that help make spaces cleaner and healthier.

For more information about MetalWorks Mesh ceiling panels, visit [armstrongceilings.com/mesh](http://armstrongceilings.com/mesh). If help is needed, reach an Armstrong TechLine expert at [armstrongceilings.com/techline](http://armstrongceilings.com/techline).
