Armstrong® Sustain® Portfolio Simplifies Sustainability Decisions

Industry-leading collection of healthy and sustainable ceiling and wall products offers verified material transparency and broadest portfolio of low embodied carbon solutions

LANCASTER, Pa. – The Armstrong® Sustain® portfolio makes it easy to specify for sustainability by offering the largest collection of healthy and sustainable ceiling and wall products with both verified material transparency and low embodied carbon.

In an industry where meeting evolving sustainability goals can be an increasingly complex equation, the [Sustain portfolio](#) of ceiling and wall products makes it easy to

satisfy multiple sustainability criteria with products that meet the following requirements:

- Declare® labeling offers verified detail and transparency of ingredients
- Free of Red List “chemicals of concern” per LBCv4.0 Red List
- Health Product Declarations (HPDs)
- Environmental Product Declarations (EPDs), including embodied carbon ratings
- Low emissions verification with UL® Greenguard Gold® certification that meets California Department of Public Health (CDPH) low emissions standards

Low Embodied Carbon Solutions

The Sustain portfolio leads the industry with the broadest portfolio of ceiling and wall products with low embodied carbon, delivering solutions that minimize the environmental impact of the overall project. (Embodied carbon reduction based on EC3 baseline for ceilings.)

Deeply committed to its own sustainability goals, Armstrong is constantly innovating and adding more low embodied carbon solutions to the portfolio.

Specifying products from the Sustain portfolio saves time in material screening during the design phase and can contribute to green building certifications, such as LEED®, WELL™, Fitwel®, International Living Building Challenge®, and Net Zero. The Armstrong [Green Genie™ Tool](#) can help specifiers calculate how Sustain products contribute to LEED, WELL, or Living Building Challenge projects.

Sustain ceiling and wall products are featured in the Mindful Materials® database and the Embodied Carbon in Construction Calculator (EC3) tool.

The Sustain portfolio offers a diverse selection of easy-to-specify mineral fiber, fiberglass, and metal ceiling panels; Tectum® wall and ceiling panels; trims and transitions; and suspension and drywall systems.

To learn more about Sustain healthy and sustainable ceiling and wall products from Armstrong, visit www.armstrongceilings.com/sustain.

About Armstrong World Industries

Armstrong World Industries, Inc. (AWI) is a leader in the design and manufacture of innovative commercial and residential ceiling, wall, and suspension system solutions in the Americas. With \$1.1 billion in revenue in 2021, AWI has approximately 3,000 employees and a manufacturing network of 15 facilities, plus six facilities dedicated to its WAVE joint venture.
