Armstrong Drywall Grid System Now Known as FrameAll™ Drywall Grid

Up to three times faster to install than traditional track and channel framing

LANCASTER, Pa. — Armstrong Ceiling & Wall Solutions has announced that its Drywall Grid System is now known as FrameAll™ Drywall Grid.

FrameAll is a pre-engineered drywall ceiling suspension system that is up to three times faster to install than traditional track and channel framing. [FrameAll drywall suspended grid solutions](#) are also designed to reduce labor and material costs compared to traditional framing methods.

The time-proven pre-engineered solutions allow architects and designers to control the finished aesthetic and achieve their design intent. Contractors benefit with faster

installation using engineered, modular components complete with stab connections, intersection routs, and hanger wire holes.

The ability of the system to service all drywall grid ceiling needs, ranging from flat and curved ceilings to corridors, soffits, clouds, and transitions, is the reason the system is now called FrameAll Drywall Grid.

All FrameAll products carry a “Made in the USA” label indicating at least 95 percent of the material is sourced and manufactured in the states.

FrameAll Drywall Grid products are also part of the Sustain® portfolio and meet the highest sustainability compliance standards in the industry today.

For more information about the FrameAll drywall grid system, visit the [FrameAll Drywall Grid page](#). If help is needed, reach an Armstrong TechLine expert at armstrongceilings.com/techline.

About Armstrong World Industries

Armstrong World Industries, Inc. (AWI) is a leader in the design, innovation and manufacture of ceiling and wall system solutions in the Americas. With \$1.1 billion in revenue in 2021, AWI has approximately 3,000 employees and a manufacturing network of 16 facilities, plus six facilities dedicated to its WAVE joint venture.
